

Numab Innovation is an evolving, innovative Swiss biotech company based in Wädenswil. The company is focused on the discovery and development of innovative, antibody fragment-based therapeutics. With our breakthrough antibody-discovery and multi-specifics engineering platform, we engage in proprietary projects as well as collaborative research on behalf of partners in the pharmaceutical industry.

For our protein engineering team, we are looking for a highly motivated and enthusiastic team member to join us as:

## **Research Associate - Antibody Manufacture**

In this position, you will be involved in the purification and biophysical characterization of antibody hit and lead candidates. You will contribute to the development of antibody-derived therapeutic proteins applying methods from a variety of disciplines, including:

- Expression, purification and characterization of antibodies and antibody fragments
- Introduction and establishment of advanced protein purification platforms
- Planning, execution, analysis and presentation of experiments
- General organization of the laboratories, evaluation and acquisition of equipment and consumables

Your profile should ideally include the following:

- BSc/MSc or equivalent in a relevant scientific discipline, preferably with prior industry experience producing recombinant proteins
- Experience in recombinant protein purification and analytics
- Profound expertise in mammalian and bacterial expression systems
- Demonstrated ability to devise strategies to optimize recombinant protein expression
- Preferably, experience with high-throughput purification and automation
- Accurate and team-oriented work style as well as a high sense of quality
- Ability to work on diverse challenges independently
- Refined computer user skills (Windows, MS Office) and communication skills

Are you looking for an inspiring, entrepreneurial atmosphere and want to be part of a dynamic team where your contributions are both essential and valued? We are looking for skilled people who are eager to make an impact. We are offering a diverse position in an innovative environment as well as a competitive compensation package.

**We are looking forward to receiving your application, either in English or German, with reference number NB035 to [hr@numab.com](mailto:hr@numab.com).**
