

Numab Therapeutics AG is an expanding, clinical stage Swiss biotech company based in Wädenswil, canton of Zürich. The company is focused on the discovery and development of novel, antibody fragment-based therapeutics. With our breakthrough antibody-discovery and multi-specifics engineering platform, we are committed to the development of differentiated therapeutics with a focus on helping oncology patients in need.

To expand and develop Numab's proprietary immune-oncology therapeutics pipeline we are looking for a highly motivated and experienced individual for a role in scientific leadership within our Translational Science team.

## **Group Leader, Scientist 100%**

In this position you will report to the VP, Translational Science and you will be responsible for leading the scientific content of pipeline projects within the immune-oncology space. Through direct and matrix management you will define and coordinate the scientific activities to ensure that the therapeutic candidates possess the required functional characteristics, and that the quality of science is of the highest level.

### **Your Responsibilities**

- Provide oncology / immune-oncology content knowledge for the development of therapeutic molecules
- Generate high quality oncology / immune-oncology in vitro and in vivo data
- Provide input to the strategy and direction of immune-oncology projects
- Generation of innovative ideas for novel differentiated therapeutic programs
- Effectively lead, motivate and engage direct reports and project team members
- Present the project to senior management and at international conferences

### **Ideal candidates will have**

- Expert knowledge in the field of therapy for immunology and immune-oncology, preferably in T cell and/or NK cell biology
- Strong experience in the development of protein-based therapeutics through to IND / CTA filing
- Relevant experience of working in cross-functional, matrix teams with a proven track record of success
- Experience of immunology in vitro assays and in vivo disease models for characterization of immune-oncology therapeutics
- A goal-oriented mindset with a passion for problem-solving
- Exceptional interpersonal and communication skills
- An accurate and independent working style
- Sound oral and written English

Are you looking for an inspiring, entrepreneurial atmosphere and want to be part of a dynamic team where your contributions are both essential and valued? We are looking for skilled people who are eager to make an impact. We are offering a permanent position in an innovative environment as well as a competitive compensation package including a participation in the company.

**We are looking forward to receiving your application with reference number NB090 to [hr@numab.com](mailto:hr@numab.com).**
