

Numab Therapeutics AG is an expanding, clinical stage Swiss biotech company based in Horgen. The company is focused on the discovery and development of novel, antibody fragment-based therapeutics. With our breakthrough antibody-discovery and multi-specifics engineering platform, we are committed to the development of differentiated therapeutics with a focus on helping oncology patients in need.

To expand and develop Numab's proprietary immune-oncology therapeutics pipeline we are looking for a highly motivated and experienced individual for a role in scientific leadership within our Discovery team.

Group Leader mAb Discovery (100%)

In this position you will report to the VP, Head of Discovery and you will supervise a team of research associates and technicians. You will be responsible for leading projects for the discovery and pharmacological characterization of innovative monoclonal antibodies. Through direct and matrix management you will define and co-ordinate the scientific activities to ensure that the monoclonal antibodies possess the required functional characteristics, and that the quality of science is of the highest level.

Your Responsibilities

- Provide strategies for immunizations and screening workflows for identification of antibodies
- Generate high quality data in biochemical and cellular assay systems to enable the progressing of Numab's discovery projects
- Contribute input to the strategy and direction of antibody discovery projects
- Provide innovative ideas for novel differentiated therapeutic programs
- Effectively lead, motivate and engage direct reports and project team members
- Present the project to senior management and at international conferences

Ideal candidates will have

- PhD in Biology, Immunology or Biochemistry and expert knowledge in Ab drug discovery with a strong focus on Ab generation (immunization, phage display, single B cell sorting, etc) and in vitro screening (cell-based and biochemical assays)
- At least three years of relevant industry experience and experience in leading and supervising a team
- Expertise in automation and flow cytometry
- A strong goal-oriented mindset with a passion for problem-solving
- Exceptional interpersonal and communication skills and sound oral and written English
- An accurate and independent working style

Are you looking for an inspiring, entrepreneurial atmosphere and want to be part of a dynamic team where your contributions are both essential and valued? We are looking for skilled people who are eager to make an impact. We are offering a permanent position in an innovative environment as well as a competitive compensation package including a participation in the company.

We are looking forward to receiving your application with reference number NB095 to hr@numab.com.
